Internship for DPS students

The students of class X of Delhi Public School, Bopal, attended an internship at a local hotel recently. Students were taken around the hotel and were given the chance to observe from the perspective of an insider.

The students were shown the different kinds of rooms the hotel had to offer and were given more insight on how eco-friendly ways can be used to make hotel stay for the guests more comfortable and how small things like recycling of plastic bottles can go a long way.

They were guided through and made to understand the importance of maintained stan-

dards in the hospitality industry and what it takes to be a 5 star hotel.

Students were given the opportunity to learn about how restaurants and food play an integral role in the making of a great hotel as they were given a tour of the unique restaurants the hotel had and what set them apart. This part of the internship also included the necessity of a 24 hour café in a 5 star hotel.

They were also then taken to more lavish parts of the hotel, which included spa, swimming pool and an in-house gym, for more relaxed guests. While on the other hand, the relation

between the corporate sector and hotels was also emphasized on. Students gained different perspectives on how the hotel works and what different purposes it must cater to, ranging from personal events to conferences.

The internship was summed up with a presentation through which students came to know about the multidimensional requirements and necessities of the hospitality industry and what exciting jobs it has to offer, and what they need to be ready to enter the industry. All in all it was an enriching experience for the students.
