

Workshop on Behaviour: a way of communication

A workshop on “Behaviour: A way of communication” was conducted by Ms. Jennifer Emmanuel on 9 June 2017 for grade 6 to 8 teachers.

Workshop began with a very thought provoking demonstration through a dried plant. And how undernourishment is responsible for this dried plant and not the plant; was explained very beautifully and was connected how behind behaviour of any students the various factors are responsible and not the student. Similarly there are lot of reason responsible for any behaviour of a child and these possible factors could be some problem at family, friends, his own perception and many more. Additionally she shared some real incidents of her life in context to the topic. She even added as how through behaviour we make judgement about people without even knowing or understanding the other person.

And being a teacher how important it is to take the role and charge of educating the young mind and behaviour. The session was ended with a very beautiful and inspirational video which made most of the participants emotional about the change a teacher can bring in the life of a student. And even wet the eyes of some teachers.

This workshop actually geared the teachers and reminded the power they have to bring a change in the life of a child.
