

Dear Parent,

Transportation to and from school is an important phase in daily routine of every student and, parents are opting different modes of transportation for their wards to and from their school.

In a commute to and from school safety of children is a big concern and, off late as we all know, with a recent unfortunate event, the matter has gained huge attention. Authorities are verifying compliance of various statutory norms, including for safe travel of students by Van/ auto-rickshaw to and from their school.

In our School, while the School is providing, through a third party contract, safe and secure mode of conveyance by School bus, we have many students travelling to and from the School using van / auto-rickshaw services provided by local operators. Needless to state, Van/ auto-rickshaw drivers tend to compromise with the statutory RTO compliances for operating vans / auto-rickshaws as a school vehicle and eventually, safety of students is being compromised.

We appreciate parents and guardians who send their children to our School by School bus and those not using vans / auto-rickshaws as a school vehicle. While the School is appropriately advising the local operators providing van / auto-rickshaw services for statutory compliances, it is advisable for all parents and students to avail transport facility from safer School bus available for transportation to and from the School. Alternately, before boarding your child in to Van/Autorikshaw, please ensure its operator complies with the laid down statutory norms.

For any further help and advice in the matter, please contact at the School.

Thanking you,

With Best Regards,

Principal,
